## *MISSION STATEMENT*

South Leicestershire Care Co-operative was formed in 2009 and commenced trading in 2010. The principal purpose for the creation of the organisation was to assist individuals to remain, as far as possible, independent and live in their own home.

We are an Early Intervention organisation, and believe that supporting people sooner rather than later helps maintain independence and dignity. We are committed to the principals of self-directed, person-centred support and positively encourage all to take control of their support arrangements.

We want to deliver high quality cost-effective services for people living at home. We aim to support people to maintain their independence by providing services which ease the daily burden of chores such as domestic support, meal preparation/serving and gardening etc. We also assist people to get out and about into the community and participate in community and leisure activities.

We intend to operate in a Cluster Model, employing local people to deliver services in close proximity thereby providing local employment and minimise travel time and cost.

We are a Social Enterprise, re-investing any surpluses back into the business, there are no shareholders. The governance of the organisation is by membership. Membership is open to all those in receipt of a service, to those providing services where South Leicestershire Care Co-operative is their main source of income, and interested organisations. Each entity, individual or organisation, carries a single vote.
